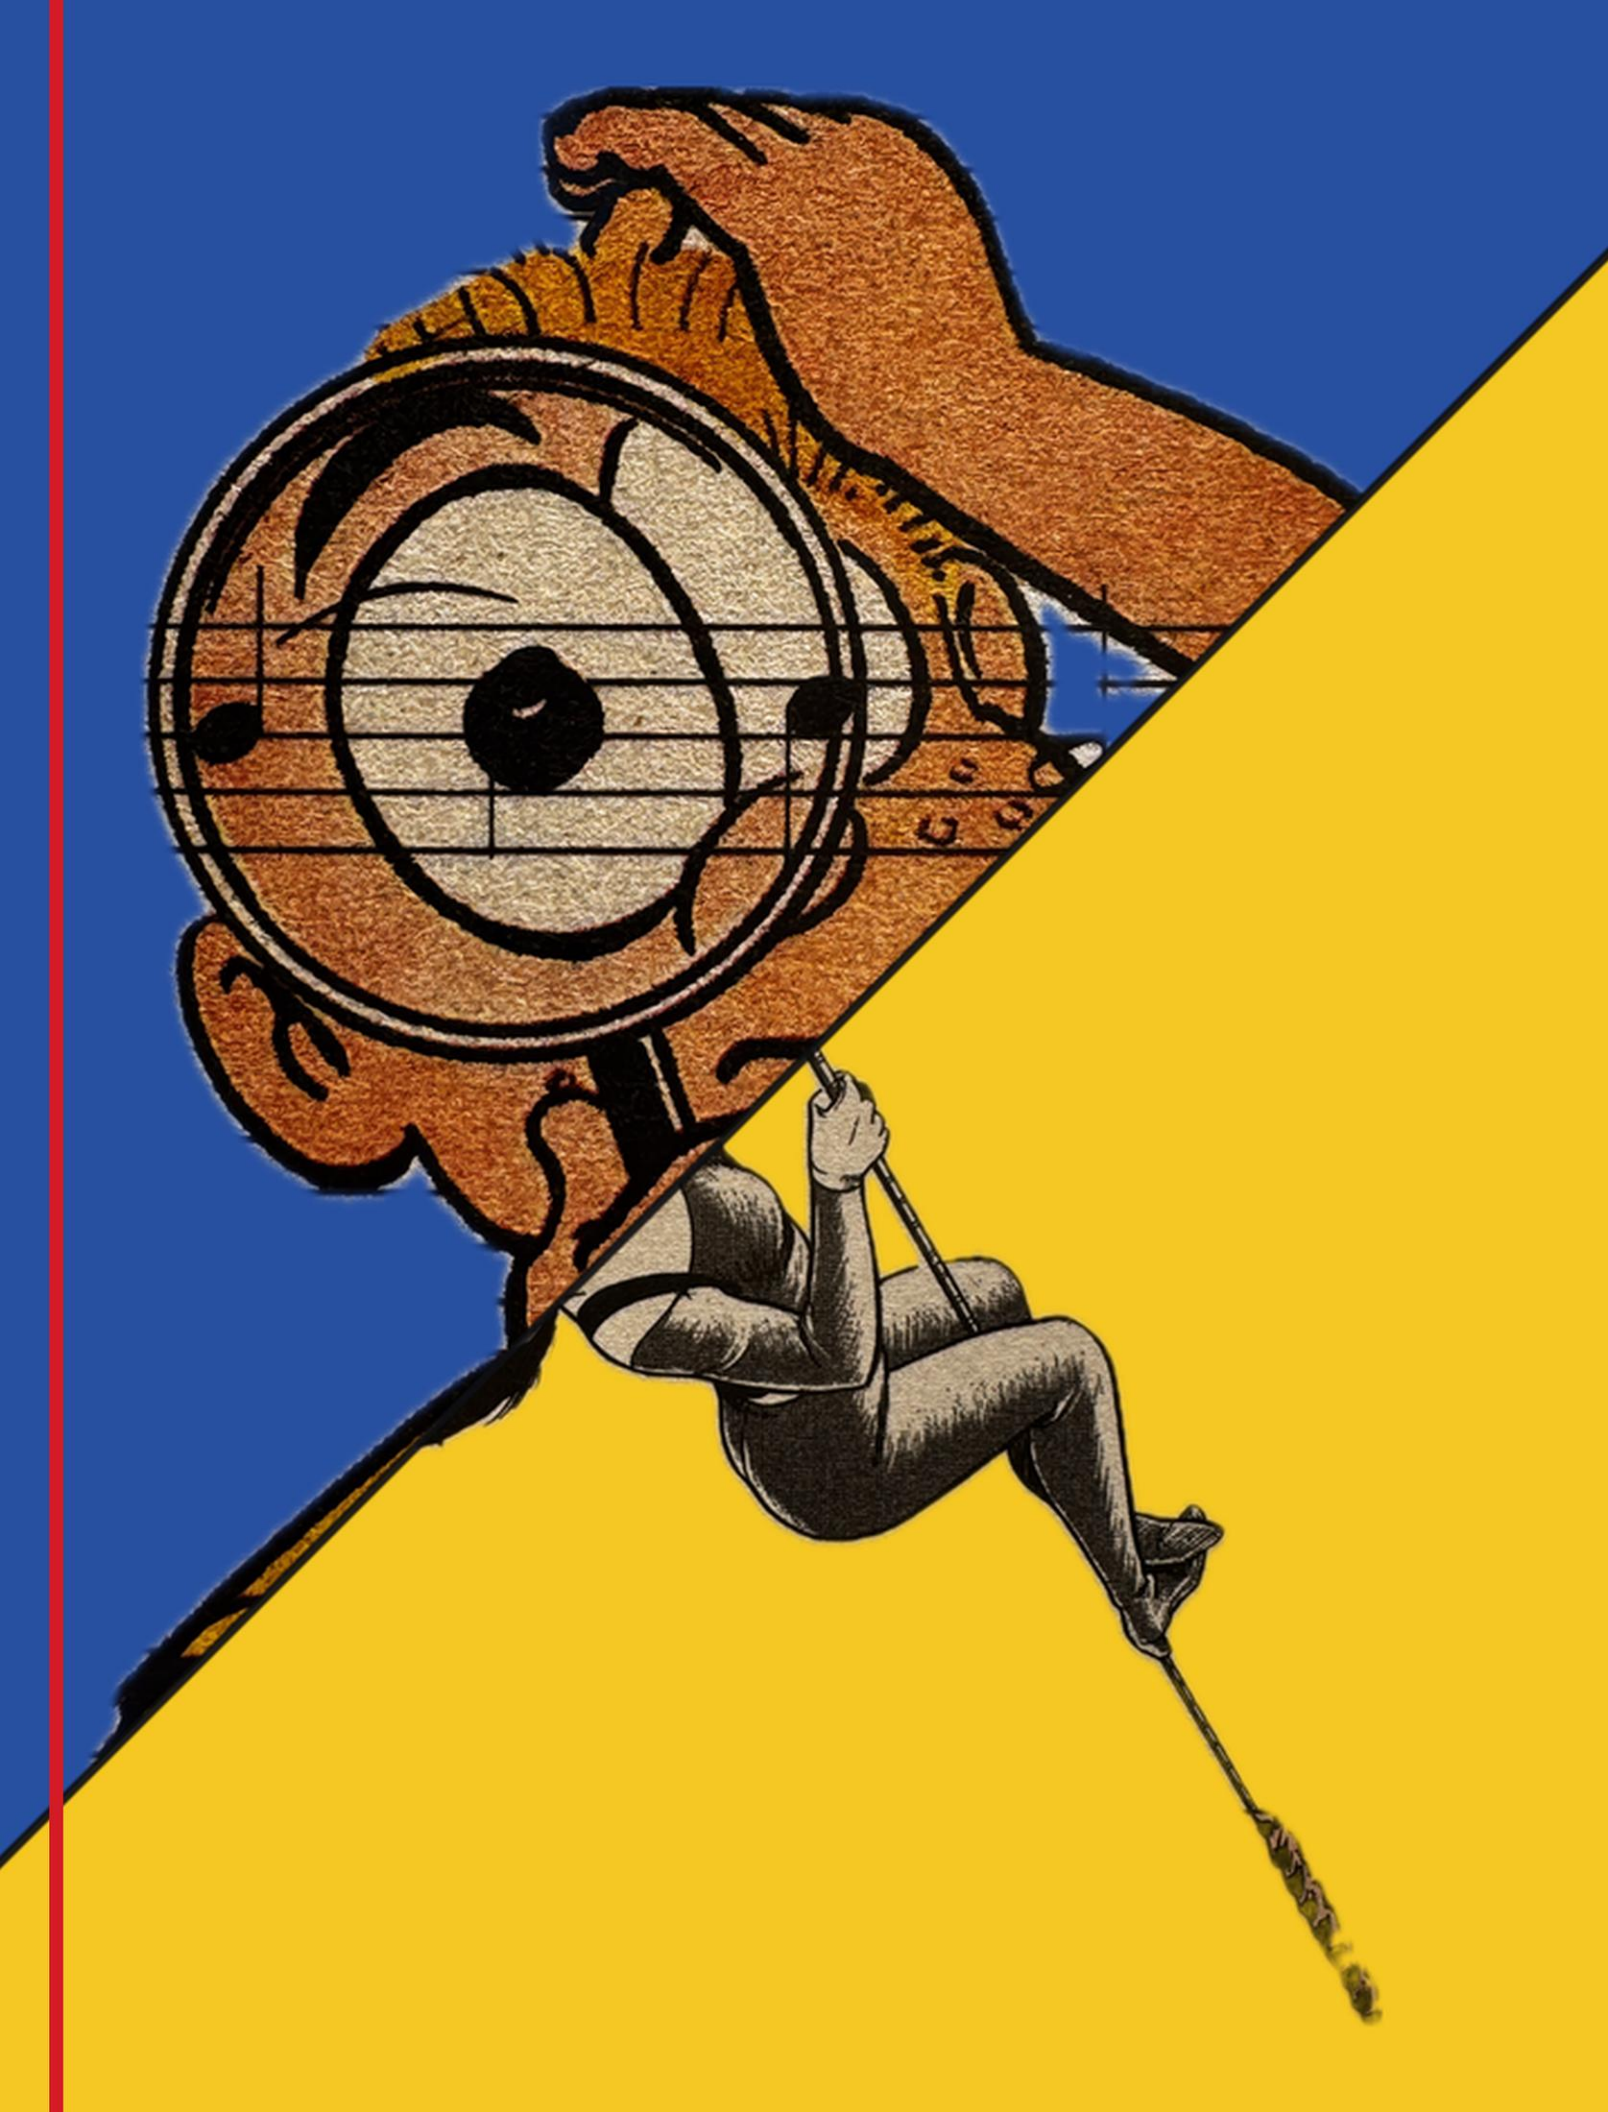

Fig. 104. Synchro Compur 1: 1. Flash terminal, 2. Shutter cocking, 3. Delayed action lock, 4. Setting ring and window for shutter speeds, 5. Press focusing button, 6. Synchronization selector, 7. Release cable socket, 8. Release lever, 9. Diaphragm setting lever.

Shutters

All lenses supplied for LOMO cameras are mounted between-lens shutters. Shutters are instruments of the highest precision and call for appropriate treatment and care in handling. It is extremely important to understand clearly the functions of
